

Industrial Manipulators

Dalmec's experience is based on its creation of thousands of manipulators, each fitted with a custombuilt tooling head to suit a specific application. On the other hand there are numerous applications which do not require the use of sophisticated gripping devices. In these cases DALMEC will propose the most suitable option from its vast range of hook units, which have a maximum capacity of up to 550 Kg.

As a standard product range, these Manipulators offer maximum reliability and affordability, and are equipped with a hook or a simple flange, allowing the operator to move a variety of components throughout the working area quickly, accurately and safely. 为客户制造成千上万台机械手，每一台都是客户定制，适用于特殊场合，戴尔麦克积累了大量丰富的经验。但是另一方面，有许多情况下并不要求使用这么复杂的抓取设备。在这些应用中戴尔麦克推出可供选择的吊钩，其中最大承重能力达550kg。作为一系列标准产品，这些机械手提供最大的可靠性和合理的价格，配备吊钩或者简单法兰，是操作人员可以在整个工作区域快速、精确和安全的移动各种部件。
